

Universal Probe ARM Writer Release Note

Date:18-11-2014
Sohwa & Sophia Technologies Inc.

This release note applies to the Universal Probe ARM Writer and contains updated information as follows:

Product number	Product name	Latest Version
UP0004	Universal Probe ARM Writer	1.0.2.0

Version 1.0.2.0

- (1) The following CPU was added to the "Device Initialization Setup" dialog of the device at a ARM Writer start-up.
 - ST Micro
STM32F401CB
- (2) Cortex-A/R came to be able to be connected by SWD.
- (3) When you use Cortex-A/R, ARM Writer came to automatically obtain device information.
- (4) The fault of registry registration of product information was corrected.
- (5) JTAGCLOCK of the ENV command of a command window corrected the fault which is not displayed correctly.
Moreover, the unnecessary command (CHANGECORE. PLDLOAD) was deleted.

Version 1.0.0.0

First release version
